02 | BASIC ELEMENTS

CABINETS

CABINETS AND CORNER CABINETS

COUNTERTOPS

CABINETRY

Elegant. Refined. Sophisticated. With the right color scheme, BURNOUT**LUX** Outdoor Kitchens are a perfect fit for a life worth savoring. Inspired by nature, the BURNOUT**LUX** palette complements and accentuates the surrounding environment, creating the optimal fit for every setting: chalk cliffs or summer clouds – the “Pure” palette brings the necessary lightness. “Dust” evokes the pristine feeling of the beaches of the South Pacific. and “Dawn” and “Shadow” reflect a sophisticated reserve.

Note: BURNOUT**LUX** Outdoor Kitchens are available in four different colors. For southern countries, we recommend using Dawn and Shadow in relatively well-shaded areas, as intensive solar radiation may cause the surfaces to become hot.

Materials

Burnout Outdoor Kitchens are designed for outside use. Made of high-quality stainless steel and weatherproof, UV-resistant materials and fittings certified for outdoor use. Built to last: at least 10 years. Guaranteed (Limited Lifetime warranty).

Plinth / Toe kick

- The polymer material used for the panels is also used for the plinth/toe kick.
- The plinth/toe kick can be modified on site with common carpentry tools (jigsaws, circle saws, drills, etc.) to trim to the necessary height.
- The plinth/toe kick can also be removed and opened at any time, for example to clean underneath the cabinetry.

CABINETRY

With designer fittings its elegant and its elegant front panels, cabinetry is a key design element in BURNOUTLUX Outdoor Kitchens. Its depth allows ample storage, and its convenient inserts for silverware and utensils mean that the necessary things are always close at hand. This makes the cooking experience even more enjoyable.

- Large drawer for storage
- Upper drawer for silverware and other smaller utensils
- 750 mm deep

With propane-tank storage and flame
Heat output von 6.5 – 9 kW and powered by propane or natural gas

With sink and propane-tank storage
Customizable placement

With sink and drawer

CERAMIC / CHAR-
COAL GRILLS

BIG GREEN EGG
MONOLITH

BIG GREEN EGG

It is the ceramic of the Big Green Egg that reflects the heat within the EGG, generating an airflow that makes the ingredients and dishes exceptionally tender. The Big Green Egg ceramic was partly developed by NASA and the production process takes place in North America according to the strictest quality standards. Just one of the reasons for the exceptionally high quality. The ceramic has superb insulating properties and can withstand extreme temperatures and temperature fluctuations.

- Built-in thermometer
- Ability to work on 2 grill areas
- Stainless steel grid
- Lifetime warranty

**ELECTRIC
STOVETOPS**

BURNOUT

INDU+

BURNOUT INDUCTION STOVETOP

Professional chefs swear by induction technology on the stove: It’s easy to precisely adjust temperatures, heat food up in an instant – and energy efficient at the same time. The Burnout Induction Stovetop brings this technology outdoors as well – the perfect complement to the grill.

- 2 independently controllable induction zones
- Illuminated control panel
- High-quality glass cooking surface
- 230 V power connection

BURNOUT Induction Stovetop with drawer

Module width	600 mm
Total output	2,8 kW

INDU+ MULTIFLEX

With its 2 rectangular cooking zones, the indu+ Multiflex gives you all the freedom you need: You can use them individually or combine them into one large cooking zone. Ideal for making a large pot of stew or heating several small pots at the same time. The Multiflex is also equipped with numerous functions for fast cooking with total control. Two controls give direct access to 15 heat settings, 3 of which are particularly convenient: one for “simmering”, one for “keep warm” and one for “booster”. The cooking zone also has a locking touch, 2 timers and a short timer, as well as several safety features.

indu+ Multiflex with drawer

Module width	600 mm
Total output	3,7 kW

INDU+ WOK

Bring Asian cuisine to your home with the indu+ Wok. Besides stir-frying, you can also use the wok to sauté, marinate, steam and even deep-fry. Its curved shape and large induction coil heat the entire surface of the 36 cm diameter pan evenly. As a result, food is heated quickly and evenly without the use of a lot of fat. What’s more, the wok is usually used on a very high power setting, which helps to preserve the colour, flavour and nutrients of the ingredients. This is why cooking with a wok is so healthy.

indu+ Wok with drawer

Module width	600 mm
Total output	3,2 kW

INDU+ TEPPANYAKI

Freedom is the key with indu+ Teppanyaki, as you can cook and fry to your heart’s content without having to worry about pot size. For teppanyaki fans, this induction version is the best of the best! Not only is it a powerful hob, but you can also set the temperature very precisely. You can roast meat or fish, prepare kebabs or cook vegetables in no time at all. This type of cooking is also very healthy because it requires very little fat. The hotplate has 2 temperature zones that can be controlled individually. The indu+ Teppanyaki 380 also has numerous functions: Controller, direct access to 10 heating levels, one of which is specially designed for cleaning!

indu+ Teppanyaki with drawer

Module width	600 mm
Total output	2,8 kW

04 | REFRIGERATION

STANDALONE REFRIGERATORS

DRAWER REFRIGERATORS

ICE BUCKET

STANDALONE REFRIGERATORS

Beer, white wine, and prosecco stay cool, even in summer’s heat. And the glass door allows every guest to know where to find the perfect cold refreshment.

- Perfect for refrigerating drinks, salads, or food
- 230 V power connection
- Approx. 63 l or 125 l capacity available
- Single temperature zone
- Glass door for a clear overview
- Lighting

Doors in black or stainless steel

Caso BBQ Cooler Medium Lux
At bar counter level

Caso BBQ Cooler Large Lux
At bar counter level

DRAWER REFRIGERATOR

Integrated drawer refrigerators from Fisher & Paykel offer additional storage for food and are the perfect complement to a BURNOUT**LUX** Outdoor Kitchen. One particular highlight is the variable temperature control. This makes the drawer convenient for various types for food and beverages, such as the clever “chill function” which is ideal for defrosts meat or fish.

- Additional storage space
- Variable temperature control with adjustable cooling zone (from -18° to 15° C)
- Precise temperature maintenance
- Additional freezing options
- 104 l total volume / 80 l useable volume

An ideal solution for unused space (750 x 750 mm) in the corner cabinets

ICE BUCKET

Champagne and open bottles of wine and water need a cool solution so they are quickly available and refreshing even when the heat is on. Et voilà!

05 | UTILITIES

LIGHTING

ELECTRICITY SUPPLY

WATER CONNECTIONS

Plinth Lighting

LIGHTING *FOR PLINTH AND BAR COUNTER*

Cleverly positioned lighting and appropriately placed sockets create a powerful visual impact. After all, as we know: food should also be a feast for the eyes.

- ZigBee capable
- Remote control function included
- Dimmable
- Warm white
- IP44 standard

Bar Counter Lighting

ELECTRICITY SUPPLY

With BURNOUT**LUX**, you are not only deciding for a perfect Outdoor Kitchen, but also for perfect service. That begins with perfect consultation and planning, followed by on-site measurements, right up to timely delivery and installation.

Service: Our technicians equip all necessary devices with an electrical connection. **Important:** The prerequisite for this is that the "Electrification" option is selected as "Yes" in the configurator.

Details about Outlets:

- IP68 certified system
- 16 A 250 V~ outlets with hinged covers
- Unbreakable thermoplastic housing
- Waterproof flush-mounted IP44
- Anthracite
- Stable and corrosion-resistant steel flange
- Double sockets are necessary for electrical appliances (appliance + lighting)

Additional Openings in Cabinetry:

If a chase needs to be opened in the rear of the Outdoor Kitchen to install cables or wires, for example, this can be done with common carpentry tools (drills, circle cutters, etc.).

MADE IN
GERMANY

FRANKE

WATER CONNECTIONS / SINKS

A water source right next to the fire source: with premium sinks from Franke made of stainless steel, everything can stay clean even during the grilling process. Rinse the lettuce, even clean a plate or two. As convenient as the indoor kitchen – nothing is more practical!

- All-in: Fitting including connection set
- Top-quality workmanship
- Sink size 500 x 410 x 200 mm
- Stainless steel faucet connected to the main water supply or to an optional drinking-water supply

06 | FURNISHINGS FOR DINING

*BAR COUNTERS
AND INTEGRATED TABLES*

SINGLE TABLES AND SEATING

BAR COUNTERS

The great thing about a Burnout Outdoor Kitchen is that it can be expanded at any time. For instance, with optional corner counter elements, providing more practical storage space.

- Convenient storage spaces for glasses or kitchen utensils
- Can be added as a corner extension
- Possibility of lighting and electrification

07 | GOOD TO KNOW

QUALITY AND DESIGN

CERTIFICATIONS

PRODUCTION

EXCELLENT CRAFT & DESIGN
MADE IN GERMANY

Compatible

Burnout outdoor kitchens are easily compatible with a variety of grill and hotplate manufacturers. That’s clear. Still, our top priorities are functionality, craftsmanship, and design. Which is why we are happy to recommend partners who meet our requirements – like Flammkraft, BULL, or Fire Magic, for example.

Weatherproof

Burnout outdoor kitchens are built for the outdoors. Made of high-quality stainless steel, weather-resistant and UV-resistant materials, and hardware certified for outdoor use. So they last: At least ten years. Guaranteed. (Limited Lifetime warranty).

Made in Germany

The craftsmanship of Burnout outdoor kitchens is unparalleled. And come pre-assembled from our own manufacturing plant in Germany. With precision in every cut. Perfection in every weld. Exactness in every seam. For more enjoyment and greater durability.

Modular

Burnout outdoor kitchens can be modified as your needs evolve. One way today. Another way tomorrow. That won’t change: our outdoor kitchens are modular and therefore can always be adapted to new wishes. Even years from now, you will be able to expand it without any alterations in the colour scheme.

Sustainable

Burnout outdoor kitchens are extremely durable. And at the same time, they are fully recyclable at the end of their life. Because withstanding wind and weather does not mean being limited to using PVC. Quite the opposite: we only use PVC-free materials to build our kitchens.

CERTIFICATIONS

PRODUCTION

HANDMADE WITH THE BEST, BY THE BEST

We take things personally – and we like it that way. Because each of our outdoor kitchens is unique, and tailored to your individual needs. And to make sure that we are able to put our hands in the fire for each of our outdoor kitchens, we manufacture them with all the attention to detail and quality found in Good Old Germany.

To be precise, in Bissendorf at our "Manustrie" – as we like to call it. It is a combination of the German words Manufaktur (handcrafted production) and Industrie (robot-supported industrial production). This allows us the best of both worlds, for every step of the production process. Because this is the only way to combine our passion for fire and flame and give it the freedom it needs: meticulous, industrial precision combined with the finest craftsmanship by our highly trained, attentive specialists.
